ABOUT US

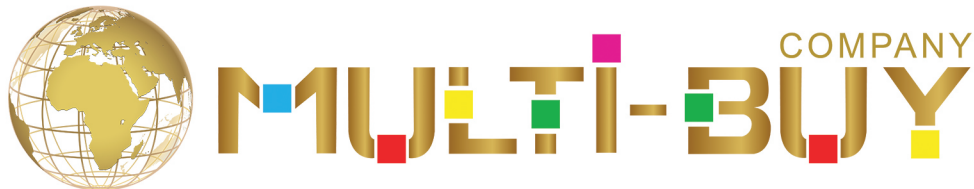

Since 1994, we worked at processing and marketing Cards, printed in offset, thermography and serigraphy, codification service, customisation, delivery, signature panels, phototypesettings.

We made the Fidelity Card Systems customisable according to the specific needs of the client; with an online CMS that manages Fidelity Cards and Credit Cards simultaneously which allows the client to organize Credit or Subscriptions. To support the Fidelity Card we have also created Multibuy Circuit (www.multibuycompany.com) , where affiliates can sell their products.

Over 130 facilities/resorts installed the electronic payment system, called TRAVELPAYCARD, usable in two different ways:

1) Charge on the room. 2) Used like prepaid.

We made customisable Management Software for businesses, gyms, clubs/discos, resorts, hotels and other organisations.

THE SOFTWARE

Travelpaycard is a software born to combine the different needs of the commercial activities, in an innovative and practical way.

This system has the following features:

- Sales management, easy and fast, can automatically administer the articles and stocks in the warehouse, using touch screen and barcode readers
- Tailor-made price lists management for Sale/Purchase for individual customers
- SMS to the customers for promotions, offers and birthday greetings
- Fidelity Cards/Gift Cards Management with easy reading using barcode readers
- Vouchers Management
- Invoices and receipts printing, takings daily check, periodic statistics
- The Ability to check the data just using a pc with Internet access
- Access control, perfect for gyms, offices, etc.

THE WAREHOUSE

Travelpay Card offers a detailed warehouse management program, divided between a central and a local one. As a result, it is possible to keep control of the volume of the total sales and those of a single workstation.

With the reports it is possible to check:

- Takings of the day of every single workstation
- Volume of the products sold and revenue derived from each product sold
- Effective operating of each employee

Each workplace has the access to the warehouse and the reports, via iCloud connecting with the main Server. This is an essential task in case of multiple facilities/stores management. From each workstation you can check all the other workstations in real time.

Sales analysis show the customers trends and preferences, showing for the most remunerative products.

Promotions and communications to the customers via SMS and customised email.

THE CARDS

The Cards are the main part of all the system!
Using the barcode on the back side, it is possible to carry out debit or charge transactions.

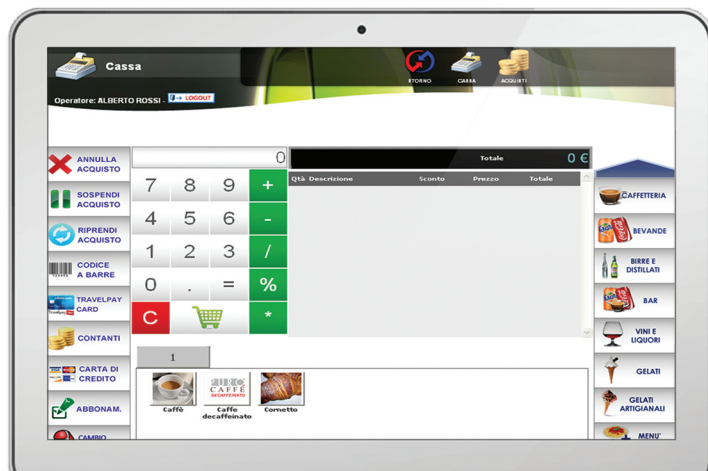

Furthermore, they will represent a proper business card that the customer will keep for the future, like a souvenir of the holiday, and to take part of the ZERO COST OPERATION, for which the customer has to show the facility card number.

TRAVELPAY FOR HOTELS / RESORTS / CAMPINGS

A safe and fast system to remove the cash circulation in the tourist facilities. At the moment of the check-in the customer will receive a Card with which they can pay throughout the entire facility (shops, bars, markets).

It simply needs an Internet connection (Wi-Fi or LAN); each workstation is connected to a local server that update an online Server every 5 minutes.

The operator will be equipped with a touch screen display: on this system it is possible to charge customers consumptions, put an account in stand-by or manage simultaneously more clients.

PREPAID CARD with amount to choose at the moment of the charge, according to the client.

DEBIT CARD (ON THE ROOM ACCOUNT) on which all the customer expenses will be charged. At the end of the stay everything will be charged on the room account.

TILL RECEIPT

Connecting a PC to a tax printer, it is possible to generate a till receipt in order to avoid having a physical cash register for non-clients of the facility system.

CUSTOMER ALWAYS UPDATED

Non-physical receipt with the purchaser's detail and card balance.

TRAVELPAY VILLAGE
Monday August 201 h. 03.40 p.m.
Workplace: Beach Bar
Operator: Mark
Card No.: 100003450660
Card: CREDIT
Mr. James Green - Room No. 113

2 Cola	3,00
1 Coffee	1,00
2 Croissants	1,80
TOTAL	5,80

Card Balance + 21,00

Keep the Card and at the end of the stay the full amount spent in the Resorts will be transformed in a discount for a Cruise with the best Shipping Companies.
More infos at the Reception or on the website
www.travelpaycard.it

ZERO COST OPERATION

In partnership with the best shipping companies

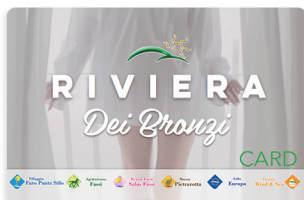

The owners of a Travepay Card will receive a discount of € 400.00 on the best offer. Furthermore, the facility that adopt the Travepay System can ask up to € 2.00 for each Card activation, resetting the costs, offering a service to the customers and giving a great discount without competing with its services.

Advertising material will be provided for free in standard format (Cards not included); on request it is possible to customise the material with the facility brand.
